

Thales Headquarter

Ditzingen, 2011 – 2012

Office/administration buildings, Industrial buildings

Directly next to the A81 autobahn, on the edge of an existing industrial zone in Ditzingen near Stuttgart, the aerospace and defence group Thales is building a new 50,000-m² office complex. In future a total of 1,800 employees from three different sites will be working together here.

In addition to offices, the building complex will house technical laboratories and areas for technical development and integration. Furthermore, an assembly and repair hall is planned. A staff restaurant and parking for 1,200 cars also forms part of the complex. The complex has been designed by schneider+schumacher, who have been appointed to carry out work stages 1-4. It is hoped that the project will be eligible for a Gold award under the LEED certification process.

Thales Headquarter

Ditzingen, 2011 – 2012

Office/administration buildings, Industrial buildings

Technical details:

Client: Milet Ditzingen Objektgesellschaft mbH & Co. KG

Typology: Office/administration buildings, Industrial buildings

Gross floor area: ca. 50,000 m² (above ground), ca. 12.000 m² (below ground)

Project manager: Christian Simons, Wiebke Rösler

Construction management: Züblin AG, Stuttgart

Procurement documentation: Direct

Service phases (HOAI): 1-4
