

Frankfurt Station Hotel

Frankfurt am Main, 2014 - 2018
Hotels

Directly south of Frankfurt's main station, just a stone's throw from the centre of the city, schneider+schumacher, working with CA Immo FFM developed the 7th site for the Steigenberger hotel group.

The new eight-storey building offers 400 hotel rooms for individual and business travellers, plus 82 spaces in an underground garage. The ground floor houses a bar, six conference rooms and a restaurant. These functions form a connection to the surroundings and help animate the public realm.

In 2014 schneider+schumacher signed the planning contract for the hotel, in 2019 the hotel was opened.

The internationally renowned office Matteo Thun & Partners was responsible for the interior design of the project.
