

Urinal in Frankfurt's station district

Frankfurt/Main, 2009 - 2015
Urban design

In early November 2015 a public urinal was set up in the Moselstrasse / Niddastrasse area, in order to remedy shortcomings in the provision WCs in the area around Frankfurt's main station. Designed by Friedrich Söllner - a student at that time - it is a looped S-shaped construction, measuring 3m high, 1m wide and 1.5m long. schneider+schumacher built the structure in stainless steel, supplied by the company Arnold.Â Â
